Professional Experience

Lift Brands

Web Developer

Aug 2014 - Present

- Develop web based internal applications.
- Angular, .Net Core, MVC SQL

Dev Mountain

Full Stack Web Development Student

Oct 2016 - Jan 2017

- **Group Project : Codewars (feature clone)**
Technology Used : Node | Express | AngularJS | PostgreSQL | Docker
Intention of this project was to create a clone of codewars.com. You can find a coding challenge and attempt to solve them by submitting your own code. My main responsibility was back-end running unit tests, using docker to test code sent from user and creating the Restful API with Express js.
- **Solo Project : UpKeep**
Technology Used : Node | Express | AngularJS | PostgreSQL
UpKeep was my first full-stack application it's designed as a to-do list and with the ability to text and email you reminders about the items you create.
